

SKYBRACKET®

CAMERA & VIDEO DETECTION MOUNTING SYSTEMS

PENDANT CAMERA MOUNT

The Sky Bracket pendant camera mount provides a light weight factory complete mounting platform utilizing schedule 40 aluminum pipe and a 1 1/2" male threaded connection. Our "factory" produced design provides a tighter, more consistent upper radius than what is currently available from "field" produced mounts.

*1 1/2" coupler available

STANDARD CAMERA MOUNT

The standard camera mount with stainless steel banding is a stable light weight mounting platform. The 9" stand off provides a low profile mount with very low wind load.

RIGID CAMERA MOUNT

The rigid camera mount is a heavy duty mounting platform. The cast 12" rigid standoff provides a rugged mount suitable for the most demanding applications.

ADJUSTABLE CAMERA MOUNT

The adjustable camera mount is a versatile infinitely adjustable mounting platform. Pole length options allow camera heights of 10ft above mast arm.

BAND CLAMP

Stainless steel band attachment system attaches clamp saddle to mast arm. Unique pressure screw design adds tension to bands to hold where other band style clamps slip.

CABLE CLAMP

Cable attachment system attaches clamp saddle to mast arm with a single 3/16" cable. Tensioning requires no special tools.

TENON MOUNT

Designed exclusively for 2" schedule 40 pipe. 2 1/4" POWER GRIP clamps securely attaches clamp saddle to tenon.

CAMERA & VIDEO DETECTION MOUNTING SYSTEMS

SB-PLT

Optional adapter bracket available for mounting Peek cameras or other burle style cameras and miscellaneous applications.

SB-6RPLT

Optional bracket available for mounting Coho cameras and other large round base cameras.

SB-IPLT

Optional lug for mounting the MS SEDCO Intersector and other single stud mount cameras.

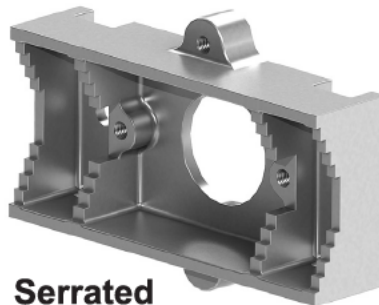

CAMERA SWIVEL

Optional direct mounting swivel for extreme low profile mount applications.

Local Distributor:

Features and Benefits:

- Variety of clamp styles available including Banding, Cable styles and U-bolt style clamp available for 2" Tenon applications.
- Fits virtually all mast arm shapes.
- Saddle castings incorporate multi-tooth serrations to provide a positive grip on mast arm.
- Design places cast components in compression loads rather than stress loads, eliminating catastrophic casting failures.
- Designed for vertical or horizontal mounting
- No set screws or pipe threads are used to minimize assembly, installation and maintenance problems.
- Components incorporate built in stops, bosses, cradles, and slots for ease of installation.
- POWER GRIP clamps provide unique positioning and holding characteristics with minimal tube distortion.
- Designed to minimize installation time.
- 2 piece saddle/swivel assembly allows simple one-man installation.
- All adjustments can be made with standard combination wrenches.
- Available with stainless steel hardware.
- Band clamp design provides a unique band tensioning device for additional band tension.
- Standard designs allow mounting of most OEM cameras, adapter plates may be required for some applications.
- Adjustable camera units incorporate a unique push-in non-directional rope type wire seal that permits installation in cold weather.
